

Tony Panozzo *General Manager*

Tony Panozzo has over three and a half decades of experience in Environmental, Hazardous Waste, and Project Management. His educational background includes a B.S. in Biological Sciences with an added emphasis on chemistry from Purdue University Calumet Campus.

Early in his progression through the environmental field, Tony began as a Field Analyst / Field Chemist for a leading Environmental Services Company, managing waste packaging and shipments at a large Research and Development facility. This experience led to operations coordination, reactive chemical management, and project management for the Technical Services largest office in the Midwest Region. Tony later took on the role of Midwest Regional Proposal Writer covering 12 Midwest states, and eventually the area Environmental Health and Safety Manager for six field locations in the Midwest Region.

Tony's Project Management experience includes waste management at large chemical and steel manufacturing facilities, emergency response, environmental remediation projects, environmental site closures including consent degree and regulatory monitor interactions, mobilization and management of large temporary workforces, and construction-based projects.

Tony Panozzo has a proven track record in Sales / Account Management which covers all lines of business for one North Americas largest Environment Services and Disposal company. Clients included all manufacturing sectors, energy related companies, transportation companies, hospitals, and universities. Tony gained additional construction related project management related to underground construction projects involving dewatering, trenching, and bypass pumping for a national dewatering and pump manufacturing company.

This broad, extensive knowledge base and experience has prepared Tony Panozzo to manage and guide services offered at Northern Plant Services.
